

My Mission Statement
Our Racing Simulator Project

I am sharing my mods with the community I've been part of for years. For everyone that plays Assetto Corsa, for anyone that wants to create, update and perfect mod content for Our Racing Simulator. I do not profess to be great at this, I am always learning, improving and wish to give what I have worked on to others to enjoy and get inspiration and motivation from. I am sharing the mods I have worked on, in the hope that others will join me and share their mods free, unencrypted and public.

I respect all the modders involved with any of the mods I am working on and may work on in the future. Should there be any issue with me sharing my work in this manner, I urge you to reconsider, take some time to think and see the bigger picture, see what I am trying to do and not jump to conclusions. Feel free to contact me if you have any questions, suggestions or just a chat. Contact me if you have worked in any manner on any of the content I'm sharing, so you can be added to the credits, as I may not have all the information.

Thank you to all the collaborators and Patreon supporters, and most of all to this amazing community!
